## Explanation of Terms Used

<b>RFPs Submitted:</b>	Total number of unique lines on the RFP tracking; people in services may have multiple lines when multiple RFPs have been sent for the same person.
<b>RFPs Placed:</b>	Total number of RFPs with placement reported
<b>RFPs Withdrawn:</b>	Total number of RFPS where the case manager, person in services, and/or guardian requested that the RFP be marked withdrawn
<b>RFPs With No Placement:</b>	Total number of RFPs where no placement was found, regardless of the number of provider responses, and the outcome was reported
<b>RFPs With No Response:</b>	RFPs where there were no provider responses
<b>RFPs Listed as Active:</b>	Total number of RFPs where the final status was not reported, and/or which remain open as of the date the reporting was pulled. There were no remaining requests active as of the date of analysis.
<b>Entity Affiliated with DP:</b>	Continuum of Colorado

## Summary by Waiver

### Number of RFPs Submitted

A total of 2,786 RFPs were requested by case managers from Developmental Pathways and **sent** by our CCB in fiscal year 2018. Of those 2,851 RFPs:

- 44% were sent for individuals on the HCBS-CES waiver
- 37% were sent for individuals on the HCBS-SLS waiver
- 19% were sent for individuals on the HCBS-DD waiver

Submitted RFPs

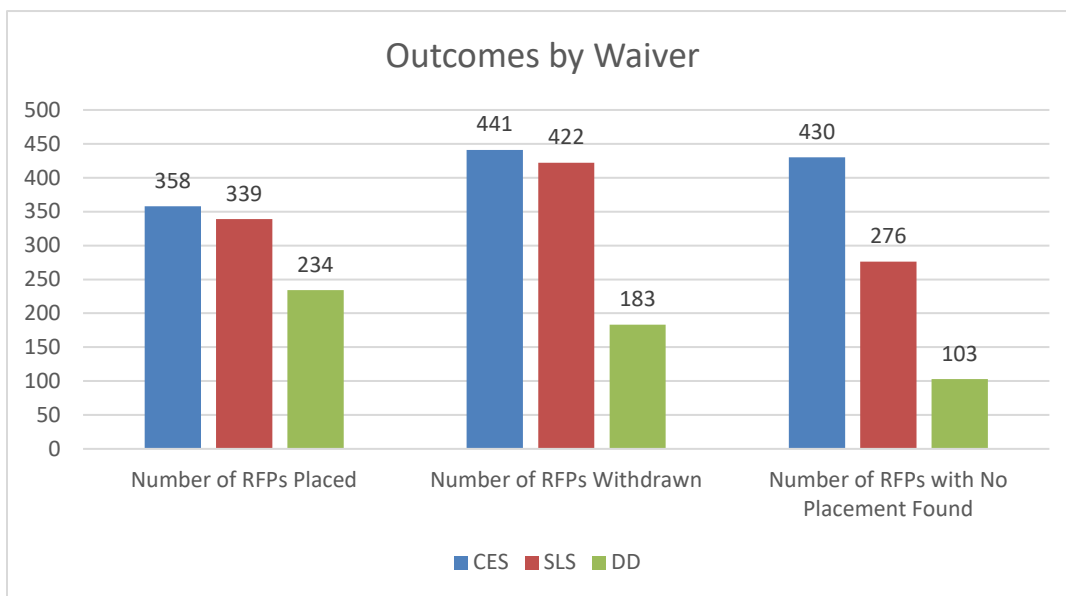

<sup>1</sup> This total includes RFPs sent by request of other CCBs and RFPs that were requested by case managers from Developmental Pathways. RFPs sent by request of other CCBs are referred to as "statewide RFPs" in this report.

<sup>2</sup> DP does not track outcomes for statewide RFPs, therefore, this data is reflective of RFPs sent for the HCBS-CES, HCBS-SLS, and HCBS-DD waivers, as well as State SLS.

<sup>3</sup> Percentages may not equal 100% due to rounding.

### Outcomes by Waiver

Of the total 2,851 RFPs that were sent (requested by both other CCBs and Developmental Pathways case managers), a total of 931 (33%) were placed with a provider, 1046 (37%) were withdrawn, 809 (28%) resulted in no placement being found<sup>4</sup> and 65 (2%) were statewide RFPs.

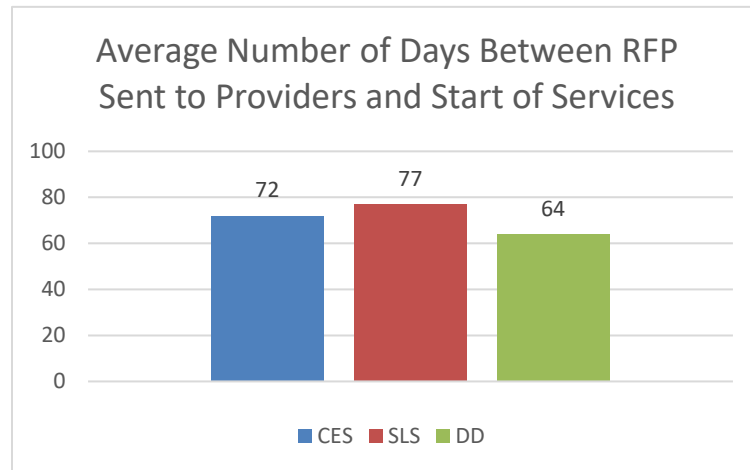

### Percent of Individuals Placed with a DP Affiliated Entity

Of the 931 RFPs that resulted in placement with a provider, a total of 107 placements (11.5%) were with Continuum of Colorado, an organization affiliated with DP.

<sup>4</sup> No placement found refers to the overall placement status of the requested service; as per the explanation of terms (page 1); there may or may not have been provider responses for these service requests.

### Average Number of Days Between RFPs Sent to Providers and the Start Date of Services

For RFPs that resulted in placement, across all waivers there was an average of 71 days (approximately 2.5 months) between when the RFP was sent to providers and when the individual began services with the chosen provider. This span includes time for the providers to review and respond to the request; time for the case manager to forward the responses to the person in services and/or their representative(s); time for the person

in services to meet with, interview, and select providers; and time for the team to determine the amount/scope/frequency and duration of services and revise the service plan.

### Summary by Provider

This chart shows the frequency with which each provider was selected to provide services as a result of the RFP process, by waiver, sorted by total number of selections.

### Summary of Resent RFPs

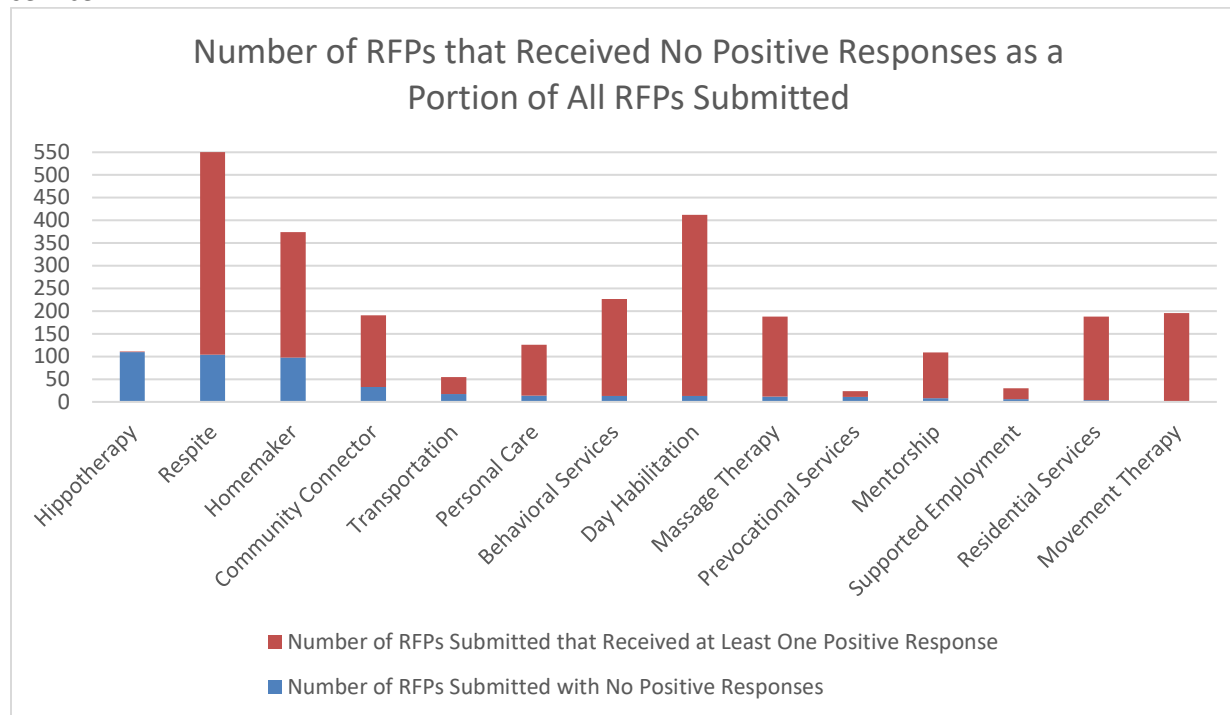

During FY18, RFPs that needed to be resent were tracked on the same line of data, rather than closing the original RFP and creating a new RFP ID and multiple lines for the same request. RFPs that had not received a response by the due date (a week after the RFP was originally sent) were automatically resent for the 1<sup>st</sup> resend. CMs had to submit requests for 2<sup>nd</sup> and 3<sup>rd</sup> resends. RFPs that were placed after being resent (any number of times) may not have necessarily been placed because of a provider responding to a resent RFP.

Out of the 2,786 RFPs that were sent by our CCB, 287 had a 1<sup>st</sup> resend, 50 had a 2<sup>nd</sup> resend, and 11 had a 3<sup>rd</sup> resend. The chart below shows the number of times a RFP was sent, by waiver.

## RFP No Response Reporting

Of the 2,786<sup>5</sup> RFPs sent by our CCB, 445 received no positive responses<sup>6</sup>. This chart shows the number of RFPs that received no positive responses compared to the total number of RFPs sent requesting each service.

<sup>5</sup> This number does not include statewide RFP requests, as Developmental Pathways does not track outcomes for statewide RFPs.

<sup>6</sup> Refer back to the explanation of terms for more information.

The following table details the numbers and percentages of RFPs per service receiving no response. Services with the highest percentage of RFPs submitted are highlighted.

## New/Established Service RFPs

Requested services were also tracked in whether the service was an established service on the individual's plan (and the individual/family was seeking a new provider), or if it was a new service for the individual (and thus no previous providers were in place). The following chart shows the number of new services compared to established services, by service category.

The following tables show the number of new and established RFPs requested, by service.

- The data show that new services are more difficult to place (31% no placement found) than established services (24% no placement found).
- Of new services, respite, homemaker, and day habilitation are the most requested services. Hippotherapy services are the least likely to be placed.
- Of established services, respite, day habilitation, and residential are the most requested services. As with new services, hippotherapy services are the least likely to be place
- Note: The most requested services are highlighted green in the tables below.

### Geographical Analysis (“No Placement Found” Reporting)

The following tables present a geographical analysis of the requests where no placement was found, by county and city and zip code. The geographical analysis is based on the current residential address of the individual for whom the RFP was sent.

Note that the total RFPs by each grouping do not match the total requests seen elsewhere in this report; these charts show data only for requests not placed, therefore geographical areas (counties, cities, and zip codes) where all RFPs were placed do not appear with these data. Statewide RFPs are not included with these data, since we do not have geographical information for those individuals.

The final table (on the following pages) shows the rate of “No Placement” by both city and service, showing which supports are most needed in which locations. The cities are sorted such that cities with the highest total number of requests are at the top. The cells highlighted in the columns “Percent Not Placed” and “Percent Requested” are those that are above average for that service.
